## **Educational visit to the Archaeological Park of Pompeii**

(FRIDAY 29TH OF MARCH)

## Educational Visit to Villa Poppea, Vico Equense and the Sorrento Coast

(FRIDAY 29TH OF MARCH)

**The Second Mobility of Learners** gave the students in seven European countries the opportunity to get involved in Science Labs (Physics and Chemistry) as well as to share experience and opinions about their schools, interests and hobbies.

The students of each delegation assisted by the teachers, presented Physics and Chemistry experiments, highly appreciated by those who attended. The activities carried out had a strong impact on the participants, making everyone to appreciate the whole planning process.

Familiarizing all the participants with good practices of promotion, dissemination and enhancement of the project results. The activities planned and carried out during the blended mobility of students also increased the confidence in the cooperation offered by European projects.

The activities carried out also included:

- revision of the chain story called “The Young Scientist” and jointly writing of the last chapters;
- discussing the Physics problems created by students during the previous workshops;
- presentation and distribution by the Polish team of the 5th newsletter.

In addition to the activities above, there were made arrangements for the future meeting in Estonia.
